SUMMARY

Fresh graduate web developer with experience in national organization websites. Pro cient in HTML, CSS, PHP, JavaScript, and WordPress. Familiar with MVC and Laravel. Skilled in responsive design, custom features, and user experience optimization. Strong in problem-solving, content management, and graphic design.

WORK EXPERIENCE

Web Developer

PRISAA National

January - April 2024

- Managed updates and content for the PRISAA National website, focused in national news.
- Integrated new features like a polling system, "Mutya ng PRISAA" pageant, and live streaming for sports events.
- Enhanced the gallery section to showcase event highlights and memories.
- Collaborated with national delegates from PRISAA and Bicol University.
- Authored articles covering the national games, ensuring accurate and timely reporting.
- Designed posters using Photoshop and Illustrator for social media promotion.
- Debugged and resolved website issues, ensuring a smooth user experience.

Web Developer Intern

PRISAA Bicol

May - July 2024

- Developed and launched the official PRISAA National website using WordPress, incorporating custom HTML and CSS for a unique design without relying on pre-built plugins like Elementor.
- Created and managed 119 sub-menu pages to compile comprehensive institutional information.
- Updated and published provincial, regional, and national news articles related to PRISAA. Ensured the website was fully responsive across mobile devices.
- Deployed the system for officials use and conducted training sessions for PRISAA officials on website management.
- Maintained the website by fixing bugs, managing plugins, and handling regular updates. Designed graphical posters and invitations using Adobe Photoshop and Illustrator

PROJECTS

Event Management system

Tools:

C#, MySQL, Windows Forms, Visual Studio 2022

Description:

Developed a comprehensive event management system using C# and procedural programming methods. Integrated a MySQL database hosted on XAMPP through the MySQL. Data NuGet package for backend operations. Implemented CRUD functionalities displayed via Data Grid on Windows Forms. Key features include event registration, user authentication, and printing capabilities.

AWARD

Outstanding Capstone Project " THE OFFICAL WEBSITE OF PRISAA NATONAL "

Academic Excellence Award

Project Management System

Tools:

HTML, CSS, Bootstrap, PHP, XAMPP, jQuery

Description:

Developed a robust Project Management System featuring full CRUD functionalities (Create, Read, Update, Delete). Integrated user authentication with login functionality and implemented a dynamic search lter for project management. The system includes status analytics to track projects as Pending, Ongoing, or Completed, along with a dashboard displaying the total number of projects created

PRISAA National Website

Tools:

Html, CSS, WordPress Photoshop

Description:

Developed the PRISAA National Website using WordPress as the CMS, leveraging custom HTML and CSS for the entire frontend design without relying on builders like Elementor. Ensured a fully responsive layout optimized for mobile devices, with dynamic content tailored for regional and national accounts. Integrated custom widgets to enhance functionality and user experience.

Personal Website Portfolio

Tools:

HTML, CSS, Bootstrap, PHP, XAMPP, jQuery .

Description:

Architected and developed a professional personal website portfolio utilizing modern web technologies including HTML, CSS, Bootstrap, and JavaScript. Implemented a secure authentication system with a user-friendly dashboard for comprehensive content management. Enabled CRUD functionality for dynamically updating sections such as skills, education, and resume. The platform features a dedicated section for showcasing personal credentials and achievements, ensuring an engaging and informative user experience.
